

CUSTOM-BUILT AND FABRICATION

PRODUCTS/SERVICES

ENGINEERING

Cost-Effective and High Quality with Assurance

CAD AND DRAFTING

3D Modeling and Simulation, Drafting, Steel detailing

CUSTOM-BUILT AND FABRICATION

Products Engineered in Canada and Made in China

VIRTUAL STAFF

Ultimate Outsourcing Solution

Need equipment or replacement parts, which need to be custom-built and fabricated? Hard to find high quality and low-cost manufacturers with warranties? We can help.

We provide a one-stop, cost-effective and fast solution for design and fabrication. The products/equipment are engineered and designed in Canada to ensure to meet your need exactly. The 3D model will be used for design, simulation, analysis and to be reviewed by clients.

The designed products/equipment are fabricated in China to ensure low cost without compromising quality. The fabricated products will be inspected and tested by clients or 3rd party before shipping to North America.

VALUE PROPOSITION

SUCCESS & PROFITABILITY

Save big and increase your success

FREEDOM & PEACE OF MIND

Get rid of the tedious works and focus on your core competencies with assurance

SIMPLICITY & SUPPORT

One stop for recruiting, engineering, design and fabrication supported internationally

OUR PROMISE

Quality is always the priority. It starts with the design, the right material and following the procedures correctly. Specifications are tightly controlled through QA procedure, both in the design office and the factories.

Lead time and lowest prices are guaranteed without compromising quality.

Any potential risk is covered under Canadian insurance policies.
